LEADING PIPELINE RESEARCH

Our Vision

Develop innovative solutions that provide for the safest, cleanest, and most efficient transportation and storage of energy via global pipeline systems.

Pipeline Research
Council International
LEADING PIPELINE RESEARCH

Our Mission

To collaboratively deliver relevant and innovative applied research to continually improve the global energy pipeline systems.

PRCI's Core Values

Enabling Creativity to Innovate

Our Team is a resource of new ideas, fueling better processes, and finding unconventional solutions for getting things done. We will continuously create better ways of doing what we do.

Collaborating Beyond Compare

We pool a diverse set of perspectives and experiences by assembling cross-functional teams to collaborate.

Committing to Excellence

We will endeavor to exceed expectations in everything we do – whether for things or people, we will always strive to do more than the expected and certainly more than the norm.

Caring for Each Other

The qualities we cultivate among us are reflected in what we deliver.

PRCI Awards Ceremony

Award Ceremony

Congratulations!

Distinguished Service Award

For distinguished service to the energy pipeline industry through a sustained commitment to PRCI and noteworthy contributions to the achievement of its mission, goals, and programs

Chris Levy

Distinguished Service Award

For distinguished service to the energy pipeline industry through a sustained commitment to PRCI and noteworthy contributions to the achievement of its mission, goals, and programs

Rick Noecker

ExxonMobil

Distinguished Service Award

For distinguished service to the energy pipeline industry through a sustained commitment to PRCI and noteworthy contributions to the achievement of its mission, goals, and programs

Joshua Bremner

Distinguished Service Award

For distinguished service to the energy pipeline industry through a sustained commitment to PRCI and noteworthy contributions to the achievement of its mission, goals, and programs

Jennifer Klementis

In-Kind Support Award

For companies that have provided
significant contributions and support
for furthering PRCI research

In-Kind Support Award

For companies that have provided significant contributions and support for furthering PRCI research

Distinguished Researcher Award

For dedicated and distinguished service and scientific achievements that have enhanced the integrity, reliability, and environmental performance of energy pipelines around the world

Ming Gao

Know someone who deserves
to be recognized for
their contributions to PRCI and the energy pipeline industry?

PRCI wants to know!

**Nominations for
Distinguished Service & Researchers
and In-Kind Support now accepted all year**

Photo Contest Winner

The installation process of a gas pipeline on which fiber optic sensors have been installed for safety monitoring to measure the strain and temperature all along the pipeline in real time to monitor the pipeline's integrity and safety. Special attachment way, the red tape and black wrap, is used to ensure the fiber optic sensor is installed well. Gilroy, California. 2023.

A stylized world map is rendered as a network of interconnected nodes and lines, representing global connectivity. The nodes are small grey circles, and the lines are thin grey lines. The map is centered on the Atlantic Ocean, with North and South America on the left and Europe, Africa, and Asia on the right. The text "International Host Site Wanted" and "250 Attendees" is overlaid in the center of the map.
